## MOUNTAINS ARE LIKE TENT PEGS

*Geologists tell us that the radius of the Earth is about 6,035 km and the crust on which we live is very thin, ranging between 2 to 35 km.*

*Since the crust is thin, it has a high possibility of shaking. Mountains act like stakes or tent pegs that hold the earth's crust and give it stability.*

*This role of mountains as being tent pegs on earth is only recently known to us then how come this was mentioned 1400 years ago in the Glorious Quran.*

*Who would have known it at that time other than  
The Almighty Creator, Allah(swt).*
